NL-FS-W

EUDI Wallet Functional Certification Scheme

Wallet Solution Conformance

RC1.0

2026-11-06

Document reference	NL-FS-W
Version	RC1.0
Status	Release Candidate
Date	2026-11-06
Document type	Framework document
Parent framework	none
Scheme Owner	Kingdom of the Netherlands Minister of Economic Affairs
Certification target	European Digital Identity Wallets and the electronic identification scheme under which they are provided
Primary audience	System/Scheme Owner, CABs, EUDI Wallet providers
Secondary audience	EUDI Wallet ecosystem stakeholders
Assurance level <identity proofing CIR 2015/1502> and <evaluation, EU Regulation 2019/881>	High/High
Subsidiary Documents	NL Certification System Documents

History of changes			
Version	Change	Status	Date
RC1.0	First consolidated version	Release Candidate Draft	2026-11-06

A.3.3 Regarding CIR 2024/2977 (PID and EAA) 18

1 Scope

This document specifies the functional certification scope for wallet solutions within the common EUDI Wallet Certification System, as well as the corresponding requirements for functional conformance. It also provides a corresponding Implementation Conformance Statement (ICS).

It identifies the documents that form the legal basis for certification, containing functional requirements applicable to wallet solutions.

This document is one of the two principal scope documents of the functional certification scheme; the other, NL-FS-P, addresses the conformance of a PID issuance service. This document operates within the framework, methodology and evaluation rules defined in NL-FS.

This document is intended for conformity assessment bodies and for wallet providers preparing a wallet solution for certification.

2 Legal basis

The functional certification scope defined in this document derives from Regulation (EU) No 910/2014 as amended by Regulation (EU) 2024/1183, in particular Article 5a (European Digital Identity Wallets) and Article 5c(1) (Certification of European Digital Identity Wallets).

Further functional requirements are specified in the Commission Implementing Regulations adopted under Article 5a(23) and Article 5a(24) of this Regulation, in particular:

- Commission Implementing Regulation (EU) 2024/2979 (integrity and core functionalities of European Digital Identity Wallets),
- Commission Implementing Regulation (EU) 2024/2982 (protocols and interfaces to be supported by the European Digital Identity Wallet Framework);
- Commission Implementing Regulation (EU) 2024/2977 (person identification data and electronic attestations of attributes issued to European Digital Identity Wallets);

Under Article 5c(1), the certification scope comprises the requirements of Article 5a(4), (5) and (8) and, where applicable, the standards and technical specifications referred to in Article 5a(24).

3 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document.

(a) NL-SYS-02, *EUDI Wallet Certification System - Vocabulary*
(b) NL-FS, *EUDI Wallet Functional Certification Scheme*

4 Terms and definitions

For the purposes of this document, the terms and definitions given in NL-SYS-02 and NL-FS apply. In particular, the terms *test objective, classification, reference test method, test area, verification by inspection and Implementation Conformance Statement (ICS)* are used as defined in NL-FS, and the terms *wallet solution, wallet instance, WSCA, WSCD and wallet provider* are used as defined in NL-SYS-02.

5 Certification scope for the wallet solution

The object of certification in scope of this document is a wallet solution provided by a wallet provider. The certification scope comprises the conformity of the functional behaviour of the wallet solution observable at its interfaces towards the following other entities in the EUDI Wallet ecosystem:

(a) PID or attestation issuance services,

(b) Relying Parties,

(c) Users,

(d) Auxiliary components such as Trusted Lists, List of Trusted Entities, and certificate revocation services

These interfaces are in scope of the certification insofar they are supported by the wallet solution that is being certified. Chapter 6 specifies the conformance requirements regarding support of wallet solution features, and Annex A specifies the corresponding Implementation Conformance Statement that shall be used by wallet providers to declare which features are supported and which are not.

6 Requirements for functional conformance

6.1 Overview

This chapter lists the requirements of the scheme regarding the features of wallet solutions mandated in the legal instruments. These requirements for functional conformance enable modularity of the certification regarding these features. This allows a wallet provider to indicate which of the legally mandated features are implemented.

This chapter categorises the conformance requirements according to the CIR in which the corresponding feature is (primarily) discussed. The rightmost column indicates the conformance level of that feature under the scheme.

Note: In this version of this document, the lists of requirements may not be fully complete. Additionally, indicated conformance levels are subject to change.

The indicated conformance levels (Optional, Recommended, Required) shall be interpreted as specified in RFC 2119. In particular, where a feature is indicated as Recommended under the scheme, it means that there may exist valid reasons in particular circumstances for a wallet provider to not implement such a feature in their wallet solution, but the wallet provider shall understand and carefully weigh the full implications before doing so and shall document these considerations. During the certification process, the certification body shall request this documentation for any recommended feature that is not implemented.

Where a wallet solution implements a feature, it shall comply with all related functional requirements in the legal basis and in the corresponding standards mentioned therein.

6.2 Requirements from CIR 2024/2979 (Integrity and core functionalities)

#	Item	Primary legal references	Conformance
1.	Wallet solution supports wallet user authentication	CIR 2024/2979 Article 3	Required
2.	Wallet solution supports wallet secure cryptographic devices and wallet secure cryptographic applications	CIR 2024/2979 Articles 4 and 5	Required
3.	Wallet solution supports wallet instance attestations	CIR 2024/2979 Article 6 and Annex 1b	Required
4.	Wallet solution supports key attestations	CIR 2024/2979 Article 6 and Annex 1b	Required
5.	Wallet solution supports revocation of wallet instance attestations and key attestations	CIR 2024/2979 Article 7 and Annex 1b	Required
6.	Wallet solution supports PID and EAA in ISO/IEC 18013-5 (mdoc) format	CIR 2024/2979 Article 7 and Annex 1I (by referencing ETSI TS 119 472-1)	Required
7.	Wallet solution supports PID and EAA in SD-JWT VC format	CIR 2024/2979 Article 7 and Annex 1I (by	Required

		referencing ETSI TS 119 472-1)	
8.	Wallet solution supports transaction logs	eIDAS Article 5a(4)(d)(i) CIR 2024/2979 Article 9	Recommended
9.	Wallet solution supports embedded disclosure policies	eIDAS Article 5a(5)(e) CIR 2024/2979 Article 10	Optional
10.	Wallet solution supports qualified electronic signatures and seals	eIDAS Article 5a(4)(e) CIR 2024/2979 Article 11 and 12	Optional
11.	Wallet solution supports User data export and portability	eIDAS Article 5a(4)(f) and (g) CIR 2024/2979 Article 13	Optional
12.	Wallet solution supports pseudonyms	eIDAS Article 5a(4)(b) CIR 2024/2979 Article 14	Optional
13.	Wallet solution supports EUDI Wallet Trust Mark	eIDAS Article 5a(5)(a)(iv) CIR 2024/2979 Article 14a	Required
14.	Wallet solution supports Strong User Authentication	eIDAS Article 5f(2)	Optional

6.3 Requirements from CIR 2024/2982 (Protocols and interfaces)

#	Item	Primary legal references	Conformance
15.	Wallet solution supports attestation issuance	eIDAS Article 5a(5)(a)(i) CIR 2024/2982 Article 4	Required
16.	Wallet solution support attestation issuance using OpenID4VCI[1]	CIR 2024/2982, Article 4 and Annex I (by referencing ETSI TS 119 472-3)	Recommended
17.	Wallet solution support PID issuance using the NL-specific issuance specification[1]	-	Required
18.	Wallet solution supports proximity attestation presentations	eIDAS Article 5a(5)(a)(iii) CIR 2024/2982 Art 5(1)	Recommended
19.	Wallet solution supports remote same-device attestation presentations	eIDAS Article 5a(5)(a)(iii) CIR 2024/2982 Art 5(1)	Recommended
20.	Wallet solution supports remote cross-device attestation presentations	eIDAS Article 5a(5)(a)(iii) CIR 2024/2982 Art 5(1) and Annex II (12)	Recommended

[1] Only applicable if requirement #15 is supported.

EUDIW CERTIFICATION SYSTEM MANAGEMENT BOARD NL
Ensuring High Assurance of EUDI Wallets & the NL National eID Scheme

21.	Wallet solution supports remote attestation presentation using OpenID4VP[2]	CIR 2024/2982, Annex II (by referencing ETSI TS 119 472-2)	Recommended
22.	Wallet solution supports remote attestation presentation using ISO/IEC 18013-7[2]	CIR 2024/2982, Annex II	Recommended
23.	Wallet solution supports access certificate verification	eIDAS Article 5a(5)(a)(vii) and 5a(5)(c) CIR 2024/2982 Article 3(1)	Recommended
24.	Wallet solution supports registration certificate verification	eIDAS Article 5b(1) CIR 2024/2982 Article 3(4)	Optional
25.	Wallet solution supports remote attestation presentation using OpenID4VP and non-API-mediated transmission (i.e., redirects)[3]	CIR 2024/2982, Annex II	Optional
26.	Wallet solution supports remote attestation presentation using OpenID4VP and API-mediated transmission (i.e., the W3C Digital Credentials API)3	CIR 2024/2982, Annex II	Recommended
27.	Wallet solution supports remote attestation presentation using ISO/IEC 18013-7 and non-API-mediated transmission (i.e., redirects)[4]	CIR 2024/2982, Annex II	Optional
28.	Wallet solution supports remote attestation presentation using ISO/IEC 18013-7 and API-mediated transmission (i.e., the W3C Digital Credentials API)[4]	CIR 2024/2982, Annex II	Recommended
29.	Wallet solution supports data erasure requests to Relying Parties	eIDAS Article 5a(4)(d)(ii) and 5a(5)(a)(ix) CIR 2024/2982 Article 6	Recommended
30.	Wallet solution supports reporting Relying Parties to a DPA	eIDAS Article 5a(4)(d)(iii) and 5a(5)(a)(x) CIR 2024/2982 Article 7	Recommended

[2] Only applicable if either or both of requirements #19 or #20 are supported.
[3] Only applicable if requirement #21 is supported.
[4] Only applicable if requirement #22 is supported.

EUDIW CERTIFICATION SYSTEM MANAGEMENT BOARD NL
Ensuring High Assurance of EUDI Wallets & the NL National eID Scheme

31.	Wallet solution supports Wallet-to-Wallet attestation presentations	eIDAS Article 5a(4)(c) and 5a(5)(a)(vi)	Optional

6.4 Requirements from CIR 2024/2977 (PID and EAA)

#	Item	Primary legal references	Conformance
32.	Wallet solution supports PID	eIDAS Article 5a(4)(a) CIR 2024/2977 Article 3	Required
33.	Wallet solution supports the following types of QEAA: <insert attestation types>	eIDAS Article 5a(4)(a) CIR 2024/2977 Article 4	Optional
34.	Wallet solution supports the following types of PuB-EAA: <insert attestation types>	eIDAS Article 5a(4)(a) CIR 2024/2977 Article 4	Optional
35.	Wallet solution supports the following types of EAA: <insert attestation types>	eIDAS Article 5a(4)(a) CIR 2024/2977 Article 4	Optional
36.	Wallet solution supports PIDs and attestations in mdoc format	CIR 2024/2977 Article 3/4 and Annex (4)	Recommended
37.	Wallet solution supports PIDs and attestations in SD-JWT VC format	CIR 2024/2977 Article 3/4 and Annex (4)	Recommended

7 Implementation Conformance Statement

7.1 ICS template

Implementations Conformance Statements (ICS) are declarations, to be completed by the developer of an object of certification, regarding the features that are supported or not supported by the object of certification. For more information on such statements within the context of the scheme, please refer to section 6.3 of NL-FS.

Annex A includes the template of an ICS for wallet solutions. Note that the 'declared implementation choices' in Annex A.3 reflect the functional conformance requirements listed in chapter 6.

Wallet providers seeking functional certification of their wallet solution shall complete this ICS.

Annex A (normative) Wallet solution ICS template

This Annex provides the template for the Implementation Conformance Statement of the wallet solution. The wallet provider completes the template and submits it as part of the application for certification. The ICS records the object of certification and the declared implementation choices.

A.1 Identification of the object of certification

Item	Declaration
Wallet solution name	
Version	
Relevant operating system	Android / iOS
Minimum supported version of OS	

A.2 Identification of wallet provider

Item	Declaration
Wallet provider name	
Wallet provider full address	
Contact person name, title	
Contact phone number	
Contact e-mail address	

A.3 Declared implementation choices

The wallet provider shall declare, using the tables below, whether the wallet solution implements the mentioned features from the cited legal instruments.

A.3.1 Regarding CIR 2024/2979 (Integrity and core functionalities)

#	Item	Primary legal references	Declaration (Yes / No)
1.	Wallet solution supports wallet user authentication	CIR 2024/2979 Article 3	
2.	Wallet solution supports wallet secure cryptographic devices and wallet secure cryptographic applications	CIR 2024/2979 Articles 4 and 5	
3.	Wallet solution supports wallet instance attestations	CIR 2024/2979 Article 6 and Annex 1b	
4.	Wallet solution supports key attestations	CIR 2024/2979 Article 6 and Annex 1b	
5.	Wallet solution supports revocation of wallet instance attestations and key attestations	CIR 2024/2979 Article 7 and Annex 1b	

6.	Wallet solution supports PID and EAA in ISO/IEC 18013-5 (mdoc) format	CIR 2024/2979 Article 7 and Annex 1I (by referencing ETSI TS 119 472-1)	
7.	Wallet solution supports PID and EAA in SD-JWT VC format	CIR 2024/2979 Article 7 and Annex 1I (by referencing ETSI TS 119 472-1)	
8.	Wallet solution supports transaction logs	eIDAS Article 5a(4)(d)(i) CIR 2024/2979 Article 9	
9.	Wallet solution supports embedded disclosure policies	eIDAS Article 5a(5)(e) CIR 2024/2979 Article 10	
10.	Wallet solution supports qualified electronic signatures and seals	eIDAS Article 5a(4)(e) CIR 2024/2979 Article 11 and 12	
11.	Wallet solution supports User data export and portability	eIDAS Article 5a(4)(f) and (g) CIR 2024/2979 Article 13	
12.	Wallet solution supports pseudonyms	eIDAS Article 5a(4)(b) CIR 2024/2979 Article 14	
13.	Wallet solution supports EUDI Wallet Trust Mark	eIDAS Article 5a(5)(a)(iv) CIR 2024/2979 Article 14a	
14.	Wallet solution supports Strong User Authentication	eIDAS Article 5f(2)	

A.3.2 Regarding CIR 2024/2982 (Protocols and interfaces)

#	Item	Primary legal references	Declaration (Yes / No)
15.	Wallet solution supports attestation issuance	eIDAS Article 5a(5)(a)(i) CIR 2024/2982 Article 4	
16.	Wallet solution support attestation issuance using OpenID4VCI[5]	CIR 2024/2982, Article 4 and Annex I (by referencing ETSI TS 119 472-3)	
17.	Wallet solution support PID issuance using the NL-specific issuance specification[5]	-	
18.	Wallet solution supports proximity attestation presentations	eIDAS Article 5a(5)(a)(iii)	

[5] Only to be declared if ICS #15 is answered with Yes.
